Cliff,

I have discussed your email and Ed's earlier email about the PMPS with Sara. She told me that Arcadis used the Trail PMPS as a template for the PMPS prepared here. Arcadis will also confirm that the PMPS, RA Work Plan, and RAD drawings have the elements and details for which the SOW refers to them. Thanks.

Subject: Revised Wallace Yard SOW

Attached, Wallace Yard and Spur Lines SOW, with two minor revisions indicated in redline/strikeout, as discussed last week.

Along with these minor revisions, consistent with our discussion last week, I also noted a few places where the SOW makes reference to carrying out work "as specified in" the RAWP, RADs, or PMPS. I made an initial attempt to do this confirmation piece myself, but quickly realized this requires some time and technical ken beyond my capacity. As such, I suggest that Arcadis do a global search on the SOW for "as specified in" or variations thereof to make sure that elements and details that are supposed to be in the RAWP, RADs, or PMPS are indeed included in these documents.

If Arcadis or other RR contractors are not immediately available for this check, this might be a task that Ed assigns to his contractors, which of course would be subject to RR reimbursement down the road.

However the RRs prefer to proceed on this, please let me know.

Thanks.
